

*We are glad to present you
the International Construction
Arbitration Moot (ICAM)!*

The ICAM is an annual competition in the sphere of arbitration of construction disputes in a form of a moot court, which is unparalleled in the field.

The ICAM is organised by the Association for the Organisation and Promotion of the International Construction Arbitration Moot. The partners of the Association are [the International Construction Law Association](#) and [the Russian Institute of Modern Arbitration](#).

The teams are invited to prepare Memoranda for the Claimant and for the Respondent, as well as the Arbitral Award basing on the provided Problem, prepared by the world's leading experts in the sphere.

The teams are required to draft the Memoranda applying the UNIDROIT Principles of International Commercial Contracts. The Award, in turn, should be based on the law of the country where the educational institution presented by the team is located.

During the Oral Hearings, each team will have to defend the position of one of the parties to the dispute against the other team presenting the other party before the panel of arbitrators.

Participation in the ICAM is a great opportunity for professional growth for students interested in construction law and arbitration, as well as for international collaboration between academics, students and lawyers from all over the world. Also, the winners and participants of the ICAM will receive the awards and certificates.

The ICAM will take place in October 2021 via Zoom.
